ENGINEERING RESOURCE PLANNER ROTHERHAM

SUMMARY

Are you ready for a challenge in a dynamic working environment?

The Engineering Resource Planner will provide engineering planning for preventative, corrective and improvement routines and tasks, to ensure all tasks are executed in an efficient and timely manner liaising with the appropriate Production and Engineering teams.

JOB ROLE

The successful candidate will ensure that all engineering and maintenance tasks (excluding breakdown's) are scheduled and packaged into executable packs ready to be implemented by the maintenance team and or service providers.

You will be responsible for ensuring scheduled activities are planned and issued to relevant parties in a timely manner to enable task execution. You will develop and produce KPI reports to demonstrate effective planning and task execution in line with agreed targets as well as sourcing and purchasing materials, spares and resources via approved vendors.

REQUIREMENTS

Working as part of a dedicated team you will have experience of working in an Engineering / Maintenance role in a manufacturing environment, with a working knowledge of CMMS systems in particular AX. You will be a motivated self-starter with a methodical and systematic approach to job planning and be able to apply sound analytical and numeracy skills.

Victrex values diversity and encourages applications from all sections of the community.

▶ TO APPLY

In addition to a competitive salary we also provide a range of attractive benefits, including company pension and healthcare schemes. If you believe you have the drive and potential required to join our team, please email your CV to: HR@victrex.com. (No Agencies) By applying for this role, you give consent for your CV to be distributed internally within Victrex for the purposes of assessing your application.

ABOUT VICTREX

Victrex is an innovative world leader in high-performance polymer solutions, focused on the strategic markets of automotive, aerospace, energy (including manufacturing & engineering), electronics and medical. Every day, millions of people use products and applications, which contain our materials – from smartphones, aeroplanes and cars to oil and gas operations and medical devices. With over 35 years' experience, we develop world leading solutions in PEEK- and PAEK-based polymers and selected semi-finished and finished parts which shape future performance for our customers and our markets, and drive value for our shareholders.
