MECHANICAL ENGINEER

SUMMARY

We are seeking to appoint 3 Mechanical Engineers to assist with the implementation of the Asset Management strategy and drive improvements in safety, asset availability and quality.

This role is based at our Hillhouse site in Thornton-Cleveleys

JOB ROLE

The successful candidate will have significant experience of implementing Engineering standards and monitoring compliance of those standards. You will be able to identify root causes and implement mitigating actions jointly with all relevant stakeholders. You will also have previously managed, designed and implemented projects that meet the required SHE, quality and cost standards.

REQUIREMENTS

The successful candidate will have a degree in a relevant discipline and proven Technical knowledge of mechanical equipment specific to a Production Plant. You will also have a thorough understanding of rotating equipment and the design and operation of Piping systems.

You will have a working knowledge of continuous improvement methods and have demonstrable experience of successfully using these in the past.

You will have experience of the implementation and operation of systems to comply with legal duties such as PSSR, PUWER & LOLER.

You will also have strong communications skills and be able to influence stakeholders across the business.

▶ TO APPLY

In addition to a competitive salary we also provide a range of attractive benefits, including company pension and healthcare schemes. If you believe you have the drive and potential required to join our team, please email your CV to: HR@victrex.com. (No Agencies)

ABOUT VICTREX

Victrex is an innovative world leader in high-performance polymer solutions, focussed on the strategic markets of automotive, aerospace, energy (including manufacturing & engineering), electronics and medical. Every day, millions of people use products and applications, which contain our materials – from smartphones, aeroplanes and cars to oil and gas operations and medical devices. With over 35 years' experience, we develop world leading solutions in PEEK- and PAEK-based polymers and selected semi-finished and finished parts which shape future performance for our customers and our markets, and drive value for our shareholders.
