

CLOSING DATE
25 October 2019

TECHNICAL LEADER JAPAN

SUMMARY

Are you ready for a challenge in a dynamic working environment?

As a Technical Leader you will be required to grow regional and global business by developing and managing the R&D facility in Japan, contributing cross-functionally to deliver the technical solutions and fill technical communication gaps with other regions to improve the Customer Experience.

JOB ROLE

You will plan, prioritise, and lead the work of the Technology Centre team, developing and delivering customer focused technical activities including quality standards, regulatory support and testing and qualification activity. You will be required to probe and validate customer needs and specifications to identify and define new product opportunities and deliver product development.

As the technical lead you will steer and cultivate the Technology Centre team, synergizing and building on individual strengths to deliver business growth and optimize the delivery of technical solutions,

REQUIREMENTS

The successful candidate will possess a Bachelors degree in Materials Science or relevant scientific with demonstrable experience of product development. You will have excellent communication and reporting skills across all levels in both Japanese and English. To be successful in the role you will have proven customer facing experience as a technical representative, with project management experience and strong influencing skills that enable you to lead cross functional teams to deliver product solutions successfully and on time.

▶ TO APPLY

In addition to a competitive salary we also provide a range of attractive benefits, including company pension and healthcare schemes. If you believe you have the drive and potential required to join our team, please email your CV to:
